FastenMaster TrapEase

Mastering the Tough Fastening Jobs!

COMPOSITE WOOD DECK SCREW

NO MORE MUSHROOMS!

Specially designed to eliminate the "mushrooming" effect caused by standard deck screws in composite deck materials.

The design features of this FastenMaster product include:

- Oversized top thread traps most loose composite material during installation
- Concave underside of the head traps any additional loose material, pushing it back into the hole
- Guaranteed corrosive resistant coating greatly outperforms standard galvanized coating. Note: TrapEase Stainless Steel is recommended for use in salt water environments.
- Sharp piercing point cuts through the composite material in the first rotation
- Deep #2 square-drive provides the best bit engagement, reducing cam out
